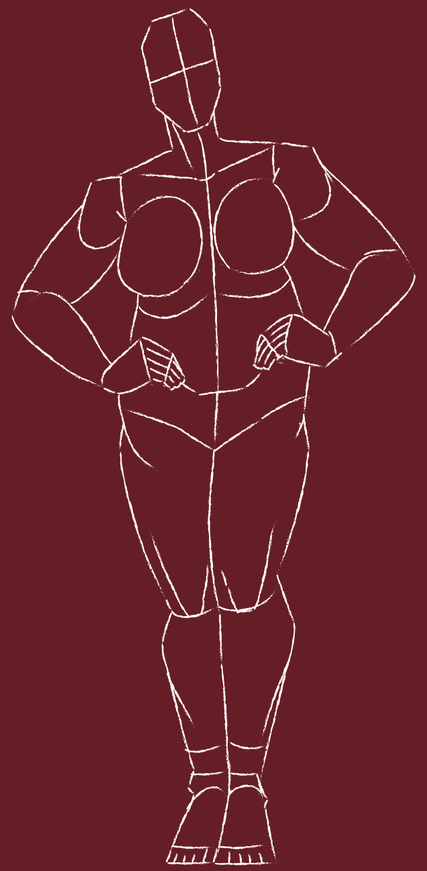
"Physical Disability in Preschool and Early School-Aged Children"

1. DEFINITION OF PHYSICAL DISABILITY IN CHILDREN:

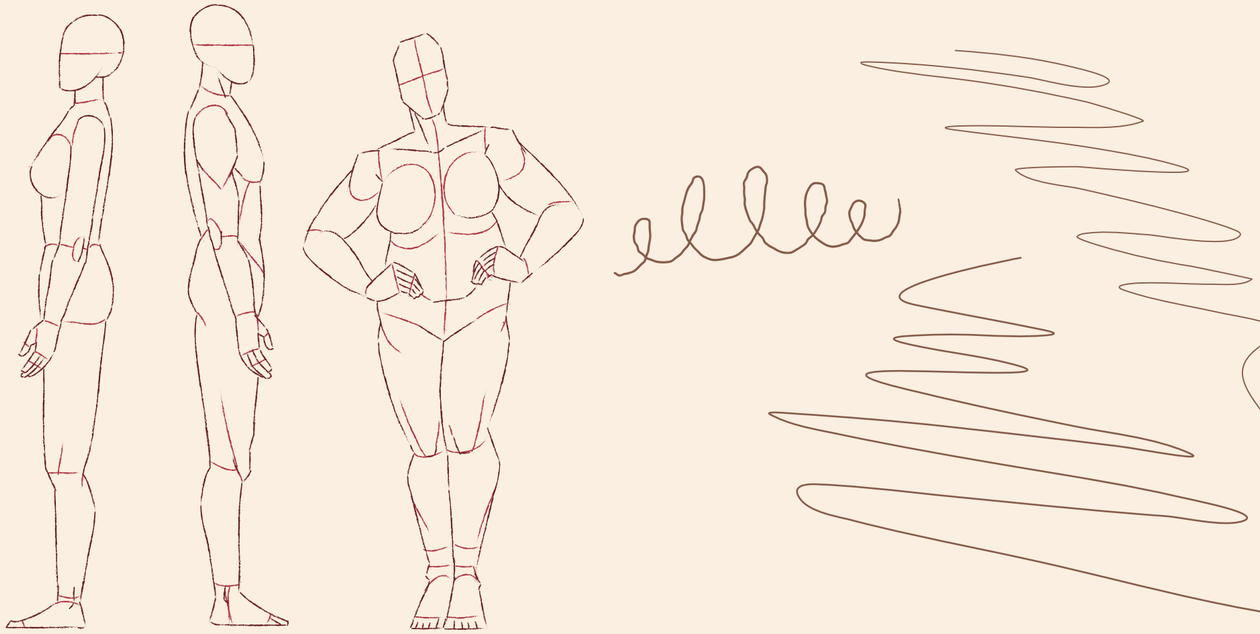
- LIMB AMPUTATIONS,
- SPINAL CORD INJURIES,
- CEREBRAL PALSY,
- GENETIC DISEASES,
- CONGENITAL DEFECTS



PEER RELATIONSHIPS

Children with physical disabilities may face challenges in forming friendships due to misunderstandings or rejection.

- **Peer Education**
- **Adult Support**



FUNCTIONING IN SCHOOL

School is a crucial part of a child's life, and for children with physical disabilities, adapting the environment, programs, and support is essential for full participation in school activities.

Inclusive Schools

Adapted Educational Materials:

Therapy and Rehabilitation

LEARNING PROCESS

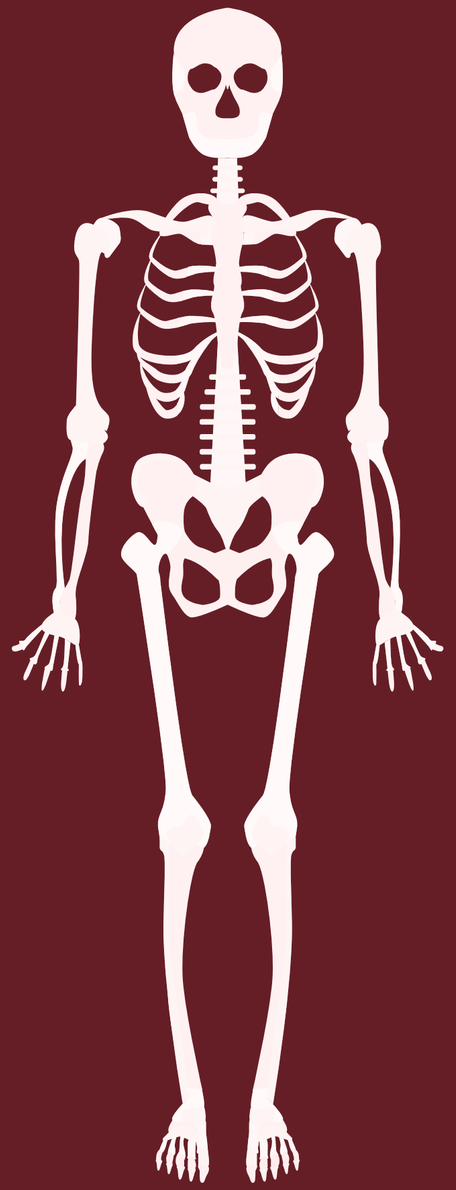
ADAPTED TEACHING METHODS:

Teachers can tailor their teaching approaches to suit the child's individual needs, for example, offering audio materials, one-on-one lessons, or group work.

MODERN TECHNOLOGY:

Tools like tablets, educational apps, and specialized software allow children with disabilities to engage with learning in a more accessible way, even if they have limited motor abilities.

DAILY LIFE, TREATMENT, AND LIFESTYLE



- Treatment
- Lifestyle
- Physical Activity

It's essential to create conditions that promote independence and are suited to their abilities.

Challenges and Support Systems:

Children with physical disabilities face many challenges, both physical and emotional. However, with the right support, they can lead successful, fulfilling lives.

- Family and School Support
- Social Support
